

DSH-882 Firmware 1.2 Upgrade Instructions

DSH-882

DSH-882

Welcome to the firmware update guide.

Please follow the instructions closely:

1. **DOWNLOAD** the DSH-882 Firmware 1.2 Update from the Dashmate Website

www.dashmate.com.au/dsh-882
2. Once the DSH-882 Firmware 1.2 has been downloaded, please **COPY** onto a SD Card, saving the file in the root directory
3. **POWER OFF** the Dashmate DSH-882 Dash Camera by removing USB Power Connector and cable
4. **REMOVE** any existing SD Card from the DSH-882
5. **INSERT** the SD Card with the new 1.2 Firmware into the DSH-882

6. **POWER ON** the DSH-882 on again using the USB Power Connector and Cable

7. The DSH-882 will update **AUTOMATICALLY**, the Blue LED will start blinking

8. After 2 minutes the Firmware 1.2 update should have finished uploading and the Blue LED will have stopped blinking
9. The DSH-882 Unit should now **TURN OFF**, Please **REMOVE** SD Card with Firmware update
10. Please **FORMAT** SD Card with Firmware update before using it again
11. Please insert a formatted SD Card into the DSH-882 and **POWER** unit back **ON**
12. Please **OPEN** the DSH-882 App and **CHECK** the Firmware
13. If Firmware 1.2 is displayed, then your unit has been successfully updated
