

Full HD Dash Camera

with 3.0" LCD Screen & Motion Detection

From the daily freeway grind, weekend away or suburban parking lot, the DSH-440 Dash Camera will be there in an incident, accident or emergency.

With its built Full High Definition optics, it will record your journey and every detail along with a date and time stamp for accurate reference when needed. The Dashmate DSH-440 provides you with peace of mind, when out on the road or parked away from home.

1080P RESOLUTION

captures your trip in full high definition recording all details on the road

3.0" SCREEN

allows for easy navigation of menus and playback

G-SENSOR

detects when there is an impact on your vehicle and saves the footage so it is not recorded over

120° FOV

through the wide angle lens brings all details on the road into frame

LOOP RECORDING

records over the oldest video file making sure you don't run out of storage space when you need it

MOTION DETECTION

will stop the Dash Camera from recording when no movement is detected

AUTO RECORD

each time your vehicle is started, the DSH-440 will automatically begin recording

PHOTO MODE

gives you the option to take 2MP photos allowing you to document the incident with additional information
