

Full-HD Discreet Dash Camera

with GPS, WiFi & Super Capacitor

Connecting your smartphone to your dash cam has never been easier, with the new dashmate app for both Android and iOS. Using the DSH-680's built in WiFi and GPS, you can record your journey, GPS location and Map data, all viewable on your smartphone.

With it's super wide angle lens and Full-HD 1080p High Resolution recording, you will be confident knowing that all the details on the road will be captured for immediate playback or future reference.

 Dashmate DSH-680 App can be downloaded from the Apple App Store and Google Play Store.

1080P RESOLUTION

Record your journey, capturing all the details in FULL-HD 1080p

G-SENSOR

Monitors for impacts to your vehicle. If your vehicle is struck, the G Sensor will lock the current recording

WIFI

Wirelessly connect to your Android or iOS powered smart device to the DSH-680

LOCATION & SPEED TRACKING

Watch your footage alongside your journey tracked on google maps

GPS SMART PHONE PLAYBACK

The Dashmate App displays your DVR footage, GPS location and speed live on your smart device

DUAL USB CAR ADAPTOR

Charge your USB powered device with the spare USB port

SUPER CAPACITOR

Keep recording on the hottest days with the built in super capacitor recording in temperatures up to 70°C

TOUCH FREE SNAPSHOT

The Gesture Sensor allows you to quickly take a snapshot by waving your hand underneath the DSH-680
