

Qi Wireless Silicone Charging Mat

Wirelessly charge your devices anywhere.

Take your wireless charging experience to the next level with this universal Silicone Wireless Charger. Dashmate's Qi Wireless Silicone Charging Mat utilises Qi Inductive Charging Technology that allows you to simply place your phone on the charger rather than fumbling with cables every time you want to charge your Qi enabled phone. Its practical design allows for use in the car, office, garage or any location with USB port access.

Fast Wireless Charging. Wherever you are.

WORKSHOP

HOME

EASY PHONE ACCESS

Just place your mobile device on the charger to charge with immediate access to your phone to receive an incoming call.

MULTI-LOCATION CHARGING

The utilitarian design means the charger can be used in the car, office, garage or any other location with access to a USB port. A great option for travel.

SILICONE RUBBER CONSTRUCTION

Durable and practical, the silicone anti-slip construction ensures a safe mounting solution without scratching your phone or surface.

UNIVERSAL

Works with Qi enabled smart phones from Apple, Samsung, Google, Microsoft, LG, HTC, Motorola and more. Also works with Qi enabled Cases, Receivers, and Battery Covers.

3 CHARGING COILS

Offering a larger charging area, you can position your device anywhere on the mat to commence charging, Fastest charging performance is achieved by positioning the device centrally on the mat.

SUPPORTS FAST CHARGING

For Android devices that allow for faster 10W charging. Requires a QC2.0 or QC3.0 USB adaptor - Not included.
